Int. J. Pres. Ves. & Piping **31** (1988) 405–407

CONTENTS OF VOLUME 31

Number 1

Editorial 1

A Fracture Behaviour Investigation of Lower Carbon Seamless Tube with Longitudinal Crack 3
W. WANG and K. D. ZHANG (People's Republic of China)

A Multi-step Approach for Evaluation of Pipe Impact Effects 15
J. M. VÁZQUEZ-SIERRA, J. MARTI and R. MOLINA (Spain)

The Effect of Uncompensated Penetrations on the Collapse Strength of Hemispherical Domes 29
M. HAMID and M. L. ROBERTS (Great Britain)

Inclusion of Intermediate Partial Constraints in Piping Flexibility Analysis—A General Approach 43
KAZEM ABHARY (Iran)

Corrosion-fatigue Crack-growth Rates in Austenitic Stainless Steels in Light Water Reactor Environments 55
J. D. GILMAN, R. RUNGTA, P. HINDS and H. MINDLIN (USA)

Cleavage Fracture Path Prediction for a Pressure Vessel Steel 69
B. STRNADEL, E. MAZANCOVÁ, S. HAVEL and K. MAZANEC (Czechoslovakia)

Number 2

Thermal, Irradiation and Cyclic Loading Analysis for Stress Fatigue Crack in Reactor Vessels 83
BENJAMIN M. MA (USA)

Plastic Collapse Analysis of Girth Weld Repair Grooves in Pipe Subjected to Offshore Laying Stresses 105
T. L. ANDERSON (USA), A. BELLONI (Italy) and A. A. WILLOUGHBY (Great Britain)

Int. J. Pres. Ves. & Piping (**31**) (1988)—© 1988 Elsevier Applied Science Publishers Ltd, England. Printed in Great Britain

Influence of Material Properties and Geometry on the Limit Load Behaviour of Flawed Structures 131
H.-J. GOLEMBIEWSKI and G. VASOUKIS
(Federal Republic of Germany)

The Effect of R-Ratio on the Elevated Temperature Fatigue Crack Growth Behaviour of $2\frac{1}{4}$Cr/Mo Steel 141
S. TURNER and J. H. BULLOCH (Republic of South Africa)

A Method for Determining J_{Ic} of Mild Steel by Means of One Single Specimen. 157
LIU YI, LI XIAO-WEI and TAO XUE-WEN (People's Republic of China)

Number 3

Wide-plate Crack-arrest Tests Utilizing a Prototypical Pressure Vessel Steel . 165
C. E. PUGH, D. J. NAUS, B. R. BASS, R. K. NANSTAD, R. DeWIT, R. J. FIELDS and S. R. LOW III (USA)

J-Integral and Stresses at an Inner Surface Flaw in a Pressure Vessel. . . . 187
W. BROCKS and H.-D. NOACK (Germany)

Determination of Residual Stress Distributions in Autofrettaged Tubing . . 205
A. STACEY and G. A. WEBSTER (Great Britain)

Small Specimen Measurements of Dynamic Fracture Toughness of Heavy Section Steels for Nuclear Reactor Pressure Vessels. 221
Y. TANAKA, T. IWADATE and K. SUZUKI (Japan)

Announcements 237

Number 4

Structural Response of Calandria Tube to a Spontaneous Rupture of the Pressure Tube 241
P. S. KUNDURPI and A. P. MUZUMDAR (Canada)

Dynamic Fracture Toughness of LWR Pressure Vessel Steel A508 C1.3: A Japanese Round-Robin Study 255
Y. NAKANO, Y. SAKAI, G. YAGAWA, K. ANDO and Y. ANDO (Japan)

Collapse Studies of a Hemispherical Dome Subjected to Partial External Pressure 271
M. HAMID (Great Britain)

Optimized Pressure Vessel Design with Special Respect to Operating Conditions 285
H. D. GERLACH (Federal Republic of Germany)

Elastic Stress Analysis of Two Oblique Intersecting Cylindrical Shells Subjected to Internal Pressure 295
HUEI-LIN CHIEN and SHAO-JUN WE (People's Republic of China)

Classification of Stresses in Locally Thinned Tubes 313
W. W. TEPER (Canada)

Announcements 323

Number 5

Late-event Viscoplasticity in Wide-plate Crack-arrest Tests 325
B. R. BASS, C. E. PUGH, J. KEENEY-WALKER
and C. W. SCHWARTZ (USA)

Buckling of A Thin Spiral Cylindrical Shell Constituted by A Series of Eccentric Semicylinders 349
HUEI-LIN CHIEN and JIU-YANG YU (People's Republic of China)

The *J*-resistance Curve Leak-before-Break Test Program on Material for the Darlington Nuclear Generating Station 363
B. MUKHERJEE (Canada)

The Fracture Properties of Aged 316 Austenitic Steel 387
R. HAVEL (Czechoslovakia), B. K. NEALE and B. A. SENIOR
(Great Britain)
